## Skills

JavaScript, HTML, CSS/LESS/SASS, Handlebars, node.js, webpack,  
REST API, Web Services, Ajax, Git/GitHub, Python, JQuery, MySQL, knockout.js,  
AngularJS, React

## Work Experience

### ***DevEire - Front End Developer, March 2019 - Present***

I specialize in crafting bespoke front-end solutions, utilizing Handlebars, JavaScript, and LESS/SASS within Content Management Systems.

My experience extends to integrating third-party platforms such as YouTube, Brightcove, TypeForm, Piano, and Parse.ly, among other analytics and media software. I work closely with clients to analyze design and requirements, ensuring timely and efficient development.

Furthermore, I coordinate with our internal teams - from QA to Back End and operations - guaranteeing comprehensive testing, seamless installation, and successful deployment.

### ***Ordorite - Software Developer, Aug. 2016 - Feb. 2019***

I've been heavily involved in developing a custom Enterprise Resource Planning (ERP) system, harnessing the power of JavaScript, CSS/HTML, Node.js, C#, and MySQL to enable end-to-end feature development.

### ***Udacity - Code Reviewer/Team Guide, 2015 - May 2017 Remote***

During my tenure at Udacity from 2015 to May 2017, I served as a Code Reviewer and Team Guide. In this remote role, I critically reviewed JavaScript, HTML, and CSS code and projects submitted by Front-End Web Developer students, providing constructive feedback and resources to bolster their skills.

As a Team Guide, my role extended to facilitating study sessions and creating an environment that encouraged students to remain committed and proactive in their learning journey.

### ***Zimmer Biomet - Product Builder, 2010 - 2015***

Assembly of knee Replacement Products for healthcare specialists to treat disorders of, or injuries to, the bones, and joints. ACME Robots & Schütte CNC Grinders

### ***Jea - Production/Design Engineer, 2009***

I was actively involved in the automation of design development processes, utilizing CAD Design, AutoCAD, and CNC programming to enhance precision and efficiency.

### ***NNG Construction Ltd. - Project Manager, 2006 - 2009***

My role encompassed comprehensive project management duties, including planning, budgeting, overseeing, and documenting every facet of the project. I offered technical assistance to the production team and handled negotiations and hiring of subcontractors.

**Sumitomo Electric Industries, Ltd. - Design Engineer/System Administrator 2001 -2006**  
Product Design AutoCAD, Pro/ENGINEER  
Online Ordering System (Samples, Quotations, Specifications)

## Education

2005, **Széchenyi István University, Hungary** - BSc in Mechanical Engineering, Quality Assurance

2015, **Udacity, Mountain View, California (online)** - Front-End Web Developer Nanodegree  
( Co-created with Google, at&t, GitHub, HACK REACTOR )

2015, **Coursera and Rice University** - Fundamentals of Computing Specialization  
Covers much of the material that first-year Computer Science students take at Rice University.

2015, **University of California, San Diego** - *UI Design Principles: an Introduction*

2014, **Stanford University** - *Machine Learning*
